

Climate Justice

The Five Anglican Marks of Mission

1. To proclaim the Good News of the Kingdom
2. To teach, baptise and nurture new believers
3. To respond to human need by loving service
4. To seek to transform unjust structures of society, to challenge violence of every kind and to pursue peace and reconciliation
5. To strive to safeguard the integrity of creation and sustain and renew the life of the earth

ACTUAL LAND AREA

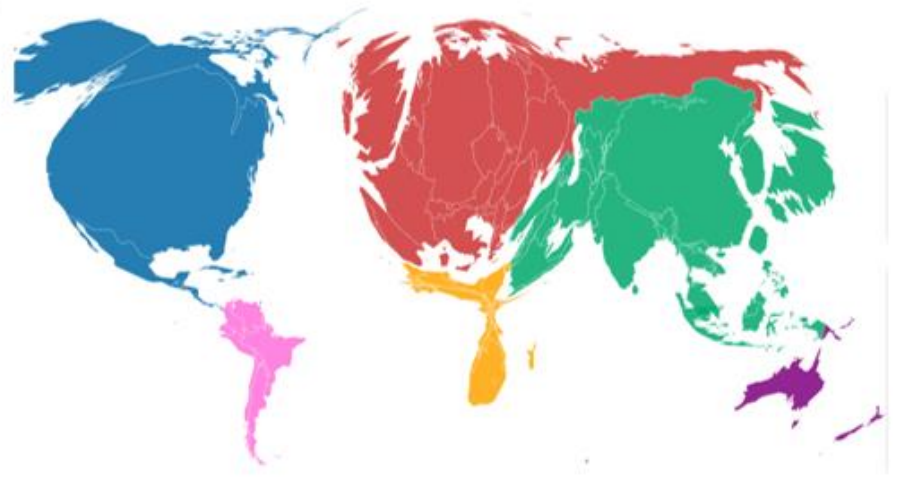

<https://www.theguardian.com/environment/ng-interactive/2014/sep/23/carbon-map-which-countries-are-responsible-for-climate-change>

CURRENT CONTRIBUTIONS

Countries are sized to show their **annual CO₂ emissions from fossil fuel use and cement production (2013)**.

This is the conventional way to view national emissions but it ignores imports and exports of fossil fuels and goods and services.

PAST CONTRIBUTIONS

Country sizes show CO₂ emissions from **historical energy use (1850 – 2011)**. These “cumulative” emissions remain relevant because CO₂ remains in the atmosphere for centuries.

VULNERABILITY TO CLIMATE CHANGE IMPACTS

Country sizes show the **number of people** injured, left homeless, displaced or requiring assistance due to floods, droughts or extreme temperatures in a typical year. Climate change will exacerbate these threats.

Our carbon footprints

Developed world

Child to 18 years – over 1,000 tonnes
CO₂

Mali

Child to 18 years – less than 2 tonnes
CO₂

Climate Justice - Malawi

One of the lowest carbon emitting countries – average carbon footprint 0.2 tonnes

- 9 in 10 depend on rain fed agriculture
- 2021 – 5th worst affected by climate-related droughts and floods
- Led to widespread cholera outbreaks
- Now in March 2023 - Cyclone Freddy

What can we do?

- **Give** – supporting Christian Aid, Tearfund etc
- **Talk** – to family, friends, neighbours, colleagues....
- **Call** – for government action in
 - maintaining/increasing aid
 - contributing our fair share of the annual \$100 billion promised to poor countries at COP26 to combat/adapt to climate change
 - contributing our fair share of the loss and damage fund agreed at COP27, compensating worst climate change-affected countries

THE CLIMATE JUSTICE

CONSIDERING THE EVIDENCE, I DIRECT HISTORIC POLLUTERS TO PAY THE VULNERABLE FOR THE LOSS AND DAMAGE THEY HAVE SUFFERED!

HISTORIC EMISSIONS' BURDEN

MISUSE OF CARBON SPACE

EXTREME CLIMATE EVENTS
